The procedure for assessing civil penalties in cases such as this is set out in the statute and the regulation. Following the discovery and investigation of a violation of a permit, notice is given to the permittee, the appropriate state agency, and the public. The permittee, the state, or any member of the public may file comments within 30 days. If requested by the permittee, a

hearing will be held before a Presiding Officer who will submit a report and recommend a decision to the District Engineer. The District Engineer will issue a Final Order on the case to the permittee. Public participation in the hearing is permitted if a hearing is held.

PENALTY PROPOSED: The amount of the penalty proposed in this case is \$11,000. This proposal is subject to revision in the interest of justice after all evidence and comments have been received and reviewed. The amount of the penalty that the District Engineer is authorized to assess as a Class I Penalty is \$11,000 per violation and not more than \$27,500 total. In a case involving multiple violators, each violator is subject to a separate, not joint, penalty.

REQUEST FOR HEARING: The permittee has 30 days following receipt of this formal notice of proposed penalty to request a hearing. Written request, by the permittee, for a hearing should be directed to the District Engineer within this designated comment period and must state the specific reasons for requesting a public hearing. The request should specify, in summary form, the factual and legal issues in dispute and the specific grounds for defense.
